

Themed Social Skills Camp

Social and Cognitive Learning Center (SCLC)

Without the busy schedule and day to day stress of school, summer is a great time to work on developing and enhancing social skills. Social skills coaching provided during play will give children the tools needed to experience, enjoy, and be motivated to engage with peers. Improved self-image, self-identity, and self-advocacy are also goals of the program. Parents will be provided with notes on progress and tools/homework to help children practice the skills at home and at other social opportunities.

There is a different theme each day (applies for both camps). Please have your child bring a toy/game related to the theme. Although we may not be focused on the theme the entire time, it is a great way to express their interests, encourage new activities, and build their confidence for socially navigating in these areas.
